FILTER GRITS AND TECHNICAL GRITS

Grain shape – oval

Application: in water purification plant. For technical purposes: sandblasting, production of abradants, in building chemistry, refractory materials.

Parameters

The name of assortment	Fraction mm
Grit Z - 1	0,3-1,0
Grit Z - 2	0,4-1,2
Grit Z - 3	0,6-2,0
Grit Z - 4	0,8-1,4
Grit Z - 5	1,0-1,6
Grit Z - 6	1,4-2,5
Grit Z - 7	1,6-4,0

The maximum content of the plus mesh 10%

The maximum content of the minus mesh 10%

Chemical composition

SiO₂	98,20%
Fe₂O₃	0,06%
Al₂O₃	0,15%

We offer for sale wet grits loose and dried grits loose. They can be by packet into big-bags or 25 kg paper bags. We can give some information about tolerance limits of the chemical composition and the size analysis and about application the individual products. We can produce fraction according to customers' requirements. Our company gives free samples for testing. We realize delivery on the basis of negotiate sales conditions.
